

Quest

Quest is a high yielding large leaf and highly stoloniferous white clover with good persistence under grazing.

LARGE LEAF

Quest is well suited to sowing in pasture mixes for beef and dairy grazing where white clover will persist.

It is highly winter active and can also set seed in most pasture swards. As such it has the ability to persist from its root system in favourable seasons, but also regenerate from seed during tough dry summers.

FEATURES

Good seedling vigour Early flowering
Highly autumn/winter active

BENEFITS

- Establishes well in mixed swards
- Provides ease of grazing to all livestock
- Provides improved recovery after grazing and persistence
- Suited to inclusion in mixes in both winter and summer dominant rainfall regions and under irrigation

SOWING RATES

Sole species	6-10kg/ha
As sole clover with perennial grass	2-3kg/ha
With perennial grass and other clovers	1-2kg/ha

Suited to All Livestock Types, Silage and Hay

Early Maturity

Australian Release >2009
