RGT Calabro is a bearded, medium-long growing season winter wheat with potential for high yields in the medium and high rainfall zone.

FULL SEASON GROWING POTENTIAL

RGT Calabro is a bearded, medium-long growing season winter wheat with potential for high yields in the medium and high rainfall zone. It is a variety that has taken a high market share in France where its maturity, high yields and good grain quality has made it desirable for growers and end-users alike.

The variety has a good disease resistance profile with very good resistance to stripe rust. With short stiff straw, harvest quality is good producing large bold grain with a high thousand grain weight.
