

Adrenalin 2

NEW
RELEASE
2023

Adrenalin 2 is a new improved late maturity tetraploid annual ryegrass.

GENERAL FIT

Adrenalin 2 is a new highly winter active annual ryegrass, developed in Europe to replace the highly successful Adrenalin. It has excellent seedling vigour making it suitable for sowing into either clean paddocks or over-sowing into sub-tropical pastures including setaria and kikuyu.

Adrenalin 2 is a few days later flowering than Adrenalin, but a major benefit of Adrenalin 2 is its outstanding rust tolerance. This enables the variety to perform at the highest level in all environments where the season will enable early-mid autumn sowing and progress well into November.

Adrenalin 2 has rust resistance rating of 7.88* (on a scale of 1-9, 9 being the best resistance) in comparison to Tetila's rating of 6. This high resistance rating makes Adrenalin 2 suitable to the coastal northern NSW and QLD markets where rust tolerance is critical to high performance and livestock palatability.

We recommend its use where growing season length can enable it to deliver to its potential.

Suited to All Livestock
Types, Silage and Hay

FEATURES

Tetraploid italian ryegrass	High winter activity
Excellent seedling vigour	Rust rating 7.88*

BENEFITS

- Fast establishing and higher quality
- More feed when it is needed most
- Fast establishing, including over-sowing sub-tropical pastures
- Suited to both northern and southern growing conditions

SOWING RATES

Oversowing kikuyu	30-50kg/ha
>850mm irrigation	35-50kg/ha
700-850mm rainfall	25-30kg/ha
500-700mm rainfall	20-35kg/ha
Oversowing perennial pastures	20kg/ha
