

RGT Menvyl

RGT Menvyl is a high performing tetraploid annual ryegrass known for its improved leafiness and outstanding yield over Speedyl.

HIGH PERFORMANCE ANNUAL RYEGRASS

Replacing long-time favourite Speedyl, RGT Menvyl tetraploid annual ryegrass demonstrates higher yields than Speedyl over a wide range of seasons and environments.

It has improved autumn vigour, stable winter and spring growth whilst boasting improved leafiness over Speedyl.

RGT Menvyl tetraploid annual ryegrass has similar maturity to Speedyl (Late season) [+18] and low aftermath heading, with superior tolerance to leaf rust over Speedyl and other annual ryegrasses.

RGT Menvyl provides an excellent option as standalone quick feed with late quality, as part of a legume blend for forage conservation, or as an oversow variety to rejuvenate for tired old pastures.

SOWING RATES

Oversowing Kikuyu	30-50kg/ha
>850mm irrigation	35-50kg/ha
700-850mm rainfall	25-30kg/ha
500-700mm rainfall	20-35kg/ha
Oversowing perennial pastures	20kg/ha

Suited to All Livestock Types, Silage and Hay

FEATURES

- Higher yielding
- Low aftermath heading
- Improved leafiness
- Excellent disease profile
- Late maturity

BENEFITS

- Improved autumn vigour
- Stable winter and spring growth providing more feed when it's needed
- Longer grazing means more feed from your pasture investment
- Improved leaf growth in comparison to Speedyl enhancing overall forage quality
- More competitive efficiency against weeds helping to maintain pasture quality and preservation

Late Maturity

Australian Release >2025
