RGT MEDALLION

RGT Medallion is a summer dormant mediterranean tall fescue. It has been selected to produce similar yields to existing types, but with lower NDF and higher ME for increased animal intake and liveweight gain.

THE MEDAL WINNING WINTER ACTIVE FESCUE

RGT Medallion It has shown excellent palatability and persistence in Australian trials. It has no endophyte and poses no animal health risks to grazing livestock, including horses and alpacas.

RGT Medallion is two weeks later flowering than current mediterranean varieties offered..

SOWING RATE

Sole grass with clovers 8-12kg/ha

Mixes with lucerne 4-6kg/ha

The Pasture Trials Network (PTN) provides rigorous, independent, and free performance data on grazing forage varieties across temperate Australia, enabling livestock and dairy producers and their advisors to select the best pasture seed varieties for sowing. The PTN program is funded through partnerships with Meat and Livestock Australia (MLA), Dairy Australia, the Australian Seed Federation (ASF), and leading proprietary seed companies. Its core aim is to enhance the productivity of Australia's national temperate feedbase.
