

RGT SPEEDYL

Top performer dairy Australia FVI

- > **More feed for your pasture investment**
- > **Provides feed when it is needed most**
- > **Well suited for late grazing into the warm season**
- > **Excellent late season quality. Enables higher quality conserved fodder which will provide more meat and milk per hectare**
- > **Late flowering (+12 to +18 days later than Tetila types)**

Suited to all livestock
types, silage and hay

TETRAPLOID ANNUAL RYEGRASS

RGT SPEEDYL

RGT Speedyl has been selected after its outstanding performance in trials against commercial standards and breeders' trial lines.

HIGH PERFORMANCE ANNUAL RYEGRASS

RGT Speedyl establishes rapidly and will provide fast winter feed, but importantly will produce high levels of quality feed later into the season than other annuals.

It is later flowering than other commercial cultivars and holds its leaf even during heading. Its feed quality is outstanding from early winter until late in the season.

RGT Speedyl continues to have outstanding performance in both the MLA PTN trials and the Dairy Australia FVI.

A solid performer backed by years of consistent data.

SOWING RATE

Oversowing kikuyu	30-50kg/ha
>850mm irrigation	35-50kg/ha
700-850mm rainfall	25-30kg/ha
500-700mm rainfall	20-25kg/ha
Oversowing perennial pastures	15kg/ha

The technical data in this document comes from test carried out by RAGT. The results obtained may vary according to agronomic and climatic conditions, as well as cultivation techniques. The technical data provided is for information purposes only and does not bind RAGT contractually.
