DIPLOID PERENNIAL RYEGRASS | Mid-Late Maturity

R·A·G·T
Breeder & seeds expert

RGT HUSTLE RGT18

Perennial now with RGT18 Endophyte

- Stronger pest protection improving productivity and persistence
- One of Australia's top performing perennial ryegrasses
- Upright growth habit provides more space for legumes and herbs to thrive
- Excellent late-season growth
- Improved animal safety

RGT18 ENDOPHYTE

INSECT
Key insect pest tolerance/ resistance

ANIMAL
Meets all required animal safety requirements

FARM
High performance when partnered with proprietary genetics

DIPLOID PERENNIAL RYEGRASS | Mid-Late Maturity

Suitable for sheep, beef and dairy cattle

RGT HUSTLE RGT18

AUSTRALIAN RELEASE > 2025

Now with RGT18 endophyte, RGT Hustle - one of Australia's top performing perennial ryegrasses - performs even better!

UNIQUE GENETICS - NEW ENDOPHYTE

RGT Hustle is now available with a range of endophyte options, allowing for a tailored selection based on your specific requirements.

RGT18 should be used for regions dealing with Black Beetle challenges affecting pasture persistence.

AR1 is suitable for areas where Argentine Stem Weevil are present, or where grazing may include deer and horses.

PROVEN PERFORMANCE

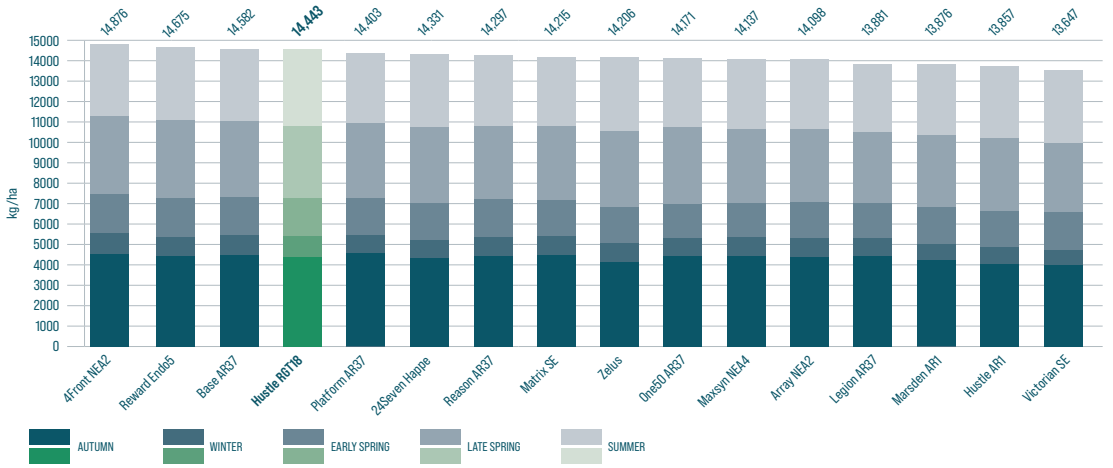

RGT Hustle has been tested nationally through numerous independent trials, as well as RAGT on-farm evaluations. Since its launch RGT Hustle has continued to grow in popularity among farmers year after year, driven by shared positive experiences.

SOWING RATE

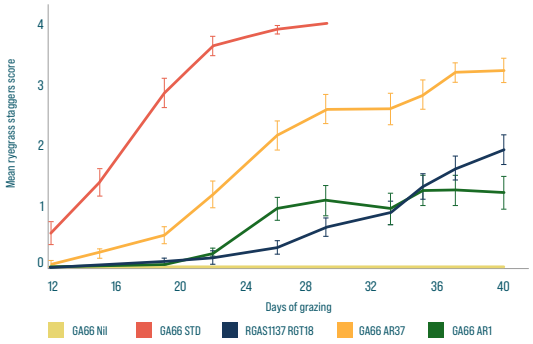

Lower rainfall regions or as part of a blend	12-15kg/ha
Higher rainfall and irrigated situations	20-25kg/ha

TRIAL DATA

PERENNIAL RYEGRASS TRIALS - UPPER NATONE TASMANIA OCT 2020- NOV 2023

RGT18 - 2024 ANIMAL SAFETY TRIAL UPDATE

RAGT NZ - Research at Lincoln university, Christchurch

RGT Hustle RGT18 shows improved animal safety vs standard endophyte and AR37

The technical data in this document comes from test carried out by RAGT. The results obtained may vary according to agronomic and climatic conditions, as well as cultivation techniques. The technical data provided is for information purposes only and does not bind RAGT contractually.

The Pasture Trials Network (PTN) provides rigorous, independent, and free performance data on grazing forage varieties across temperate Australia, enabling livestock and dairy producers and their advisors to select the best pasture seed varieties for sowing. The PTN program is funded through partnerships with Meat and Livestock Australia (MLA), Dairy Australia, the Australian Seed Federation (ASF), and leading proprietary seed companies. Its core aim is to enhance the productivity of Australia's national temperate feedbase.
